Move.....	111
TStream Read and Write	111
Windows API.....	112
Chr -> Char.....	112
Character Literals.....	112
Integer and Float To AnsiString	113
TreeView and Unicode nodes	114
UpperCase.....	115
Globalisation and localisation.....	116
Globalisation and SysUtils	116
Localisation using ResourceStrings	117
Not for runtime packages.....	118
Win32 Localising and the Translation Editor	118
Translation Editor.....	121
External Translation Manager	123
Switching Languages (at run-time)	123
Modified LoadNewResourceModule.....	125
Deployment.....	126
Summary	126

This Delphi 2010 Development Essentials manual covers the fundamentals and the new features in Delphi 2010, 2009 and 2007 compared to Delphi 7. There are some more advanced topics that fell beyond the scope of this “development essentials” manual that are covered in other places (see <http://www.eBob42.com/courseware> for details).

- Delphi 2010 DataSnap Development
- Delphi 2010 XML, SOAP & Web Services
- Delphi Prism 2010 Development Essentials
- Delphi for Win32 Database Development (currently covering Delphi 2007)
- Delphi for Win32 VCL for the Web Development (also for Delphi 2007)

The Database Development manual will be rewritten and enhanced for Delphi 2010 later this year. The VCL for the Web (aka IntraWeb) title will be rewritten for IW XI, and probably ready when Delphi 2011 ships.
